**Subject:** Australian Chair Health Panel PFAS grilled by media on the Panel findings  
**Attachments:** AUST. DEPT. HEALTH 2018 - Summary- Expert Panel's Findings.pdf; AUST. DEPT. HEALTH 2018 -Media Release-Expert Health Panel's Independent PFAS Advice, May 2018 dept005.pdf; AUST. DEPT. HEALTH 2018 - Expert-Independent health Panel's PFAS Report -May18.pdf

Dear all

In May 2018, I shared with you all the attached reports of which I also expressed reservation as to its conclusion and findings. Some of you who are PFAS toxicologists were kind enough to respond with comments regarding the adequacy and accuracy of the findings which was much appreciated (I then share with all the various comments).

Read now the attention made to that reports (see below) and whether the selected panel of experts and its chair are the right people to write the report and to then advise the Australian government regarding PFAS health impact.

<https://www.theherald.com.au/story/5543145/chair-dragged-into-pfas-panel-role-williamtown-public-hearing/>

I believe more will come out as last month the Australian government announced that there will be Senate enquiry on the impact of PFAS upon the environment and human health of which needless to say the Panel of Expert report will be scrutinised by many and not just regulators (which has begun reading the above news). NB: The Herald is a major Australian newspaper and not some small country town newspaper.

kind regards
